

Practitioner Challenges in Object-Centric Process Mining

Timo Peters, Bayer

Nicolas Größlein, BMW Group

Ula Jessen, ECE

Frederik Knockaert, Euroclear Bank

Florian Koepke, Olympus

Join our first ICPM Fellows
online event – 26th June 2025.

Our first online session: Object-Centric Process Mining

5 practitioners with extensive OCPM experience **present**

challenges in making OCPM work in **industrial practice** on

- building object-centric event data models
- taking object-centric analysis to the next level

As researcher, you get

- **concrete insights** into practitioner's view on OCPM
- **inspiration** for your research
- chance to follow-up and **start a collaboration** with practitioners on OCPM

As attending practitioner, you get

- **lessons learned** about transitioning to OCPM
- **connect** with fellow experts in process mining on working with and analyzing data in an object-centric way
- **follow-up and raise your own challenges** to present in future ICPM Fellows sessions

As software developer, you get

- **reflection on** state of PM technology stack for OCPM from **user perspective**
- chance to follow-up and **start a collaboration** with practitioners and researchers on the **next OCPM capabilities**

Our first online session: Object-Centric Process Mining

Objectives

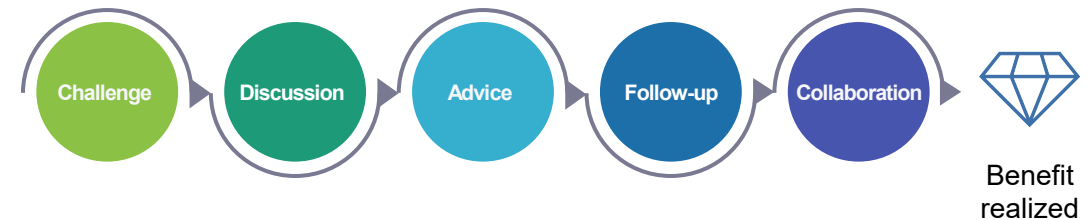

- 🔍 Surface real OCPM challenges in process mining practice
- 👥 Connect practitioners, vendors, and researchers
- ⚡ Provide on-the-spot advice & structured follow-up

Format

- 🕒 2h online interactive session
- 👥 Challenge owners present, guided by ICPM Fellows moderator
- 💬 Immediate discussion and feedback in the session
- 🔗 Longer term follow-up: build collaborations between practitioners, researchers and developers to solve challenge

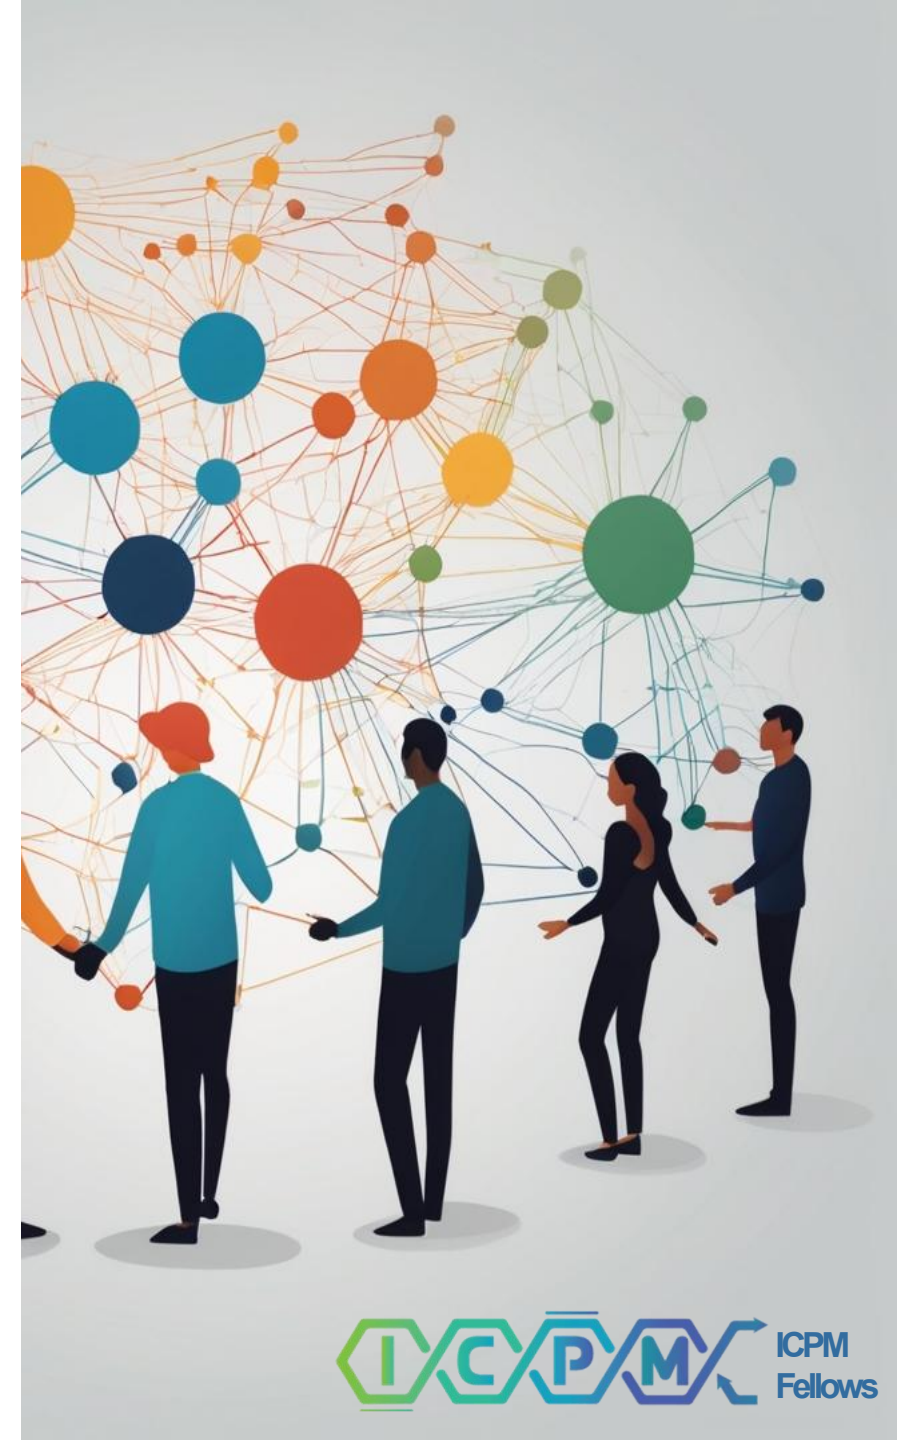

Outcomes

- ✓ Immediate advice from the community
- ✓ Follow-up support & connections for advanced challenges

What's in it for You?

- 🚀 Get insights in & instant feedback on practical challenges
 - 🌐 Connect with global process mining experts
 - 🔗 Open doors for bi- & tri-lateral collaborations
 - 💡 Get a kick-start on how to approach your challenge
-
- 👉 Be part of shaping the next wave of process mining innovation.
 - 👉 Join the first ICPM Fellows online event!
 - 📄 Please register using the URL in the comment section!

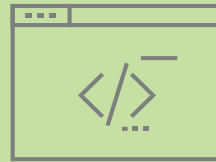

ICPM Fellows

Our Mission

To tackle real-world process mining challenges and accelerate innovation through joint action.

Implements solutions
at scale

Software Vendors

Develops foundational
ideas to solve problems

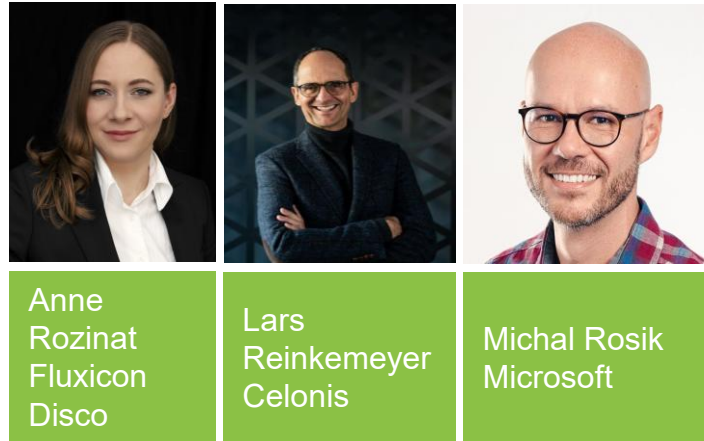

Academia

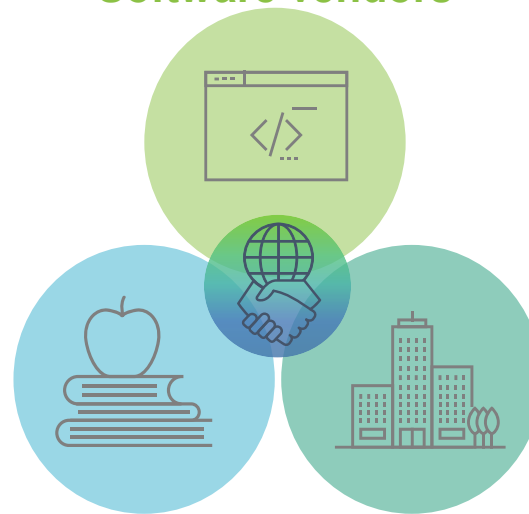

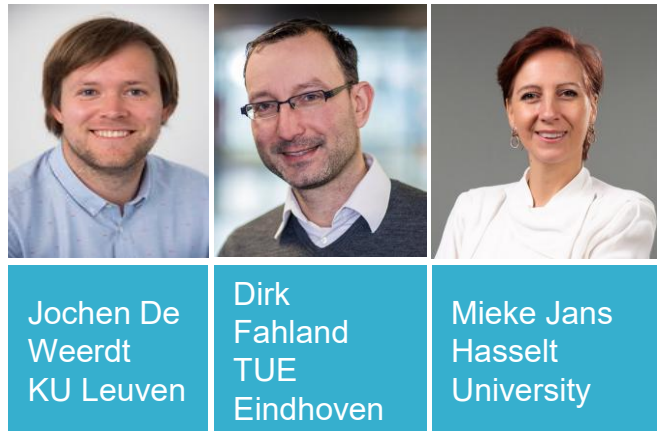

Practitioners

Has real process
analysis problem

ICPM Fellows

- ICPM Fellows is an initiative that grew out of the annual International Conference on Process Mining (ICPM) (<https://icpmconference.org>).
- Since 2019, ICPM has emerged as the **leading event where process mining vendors, consultants, customers, end-users, and researchers come together** to share insights, drive innovation, and explore new frontiers in the field.
- Staying true to this spirit, **ICPM Fellows events bring structure, voices, and action** to the most pressing issues in the field.
- ICPM Fellows operates under the umbrella of the IEEE Task Force on Process Mining (<https://www.tf-pm.org>).
